EDUCATION

CS + Econ @ Harvard University (Class of 2030)

Cambridge, MA

Julia R. Masterman High School

Philadelphia, PA

Robotics (Co-Founder & Lead Programmer) | Chess Team (Co-Captain) | AI Club (President) *Sep 2018 – June 2026*

EXPERIENCE

Amazon

New York City, NY

Incoming Software Development Engineer

Jun 2027 – Aug 2027

Wndr VC

San Francisco, CA

Venture Capital Investor

May 2026 – Present

- Ran events and invested \$100,000 in early-stage startups with capital allocation from Wndr (\$3b+ AUM)

Ventus AI (a16z)

San Francisco, CA

Machine Learning Engineer (Youngest hire ever)

Apr 2026 – Present

- Created a system that automates insurance verification coverage for specific treatments within one API call

Wharton's Stevens Center for Innovation in Finance

Philadelphia, PA

Full-Stack Developer

Jun 2024 – Jun 2025

- Enhanced key features of a student loan application to accurately project college costs, using PostgreSQL for data management and Spring Boot for API development
- Created a responsive website for the Finiverse project, and created web features for a data visualization platform.

University Research

Remote

Applied Machine Learning

Jun 2024 – Aug 2025

- **Carnegie Mellon University:** Used Self-Adapting Language Models (SEAL) to improve email phishing filters.
- **University of Washington:** Built a ML pipeline system to classify COVID-19 variants from Single Molecule Break Junction (SMBJ) conductance signatures; achieved up to 99.97% accuracy.

PROJECTS

LearnAI | *Computer Vision, Javascript, GSAP*

Feb 2024 – May 2024

- Awarded **\$2,500** at a Hack-a-thon by creating a website redefining AI education with
- Built from scratch utilizing GSAP and Lenis for animations and smooth-scrolling also mimicking features from Apple's website.

Micro Pantry Mobile App | *Computer Vision, React-native, Gen AI*

Apr 2024 – Dec 2025

- Awarded **\$6,000** for various startup competitions for creating an app using Expo, React, and React-native as the frontend
- Implemented Tensorflow, specifically ICR, receipt, and food detection models

Other Projects | *Web Development, Machine Learning, Robotics*

2024 – 2026

Root2Success

SMBJ ML Pipeline (UWash)

Math Modeling Analysis

APUSH Website

Real-time Edge Detection

LockedIn Extension

FTC Robotics '24

FRC Robotics '25

FTC Robotics '23

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML/CSS, TypeScript, Python, LaTeX

Frameworks/Libraries: Pandas, React, TensorFlow, OpenCV, Tailwind, Matplotlib, GSAP, Spring Boot

Skills: Web/App Dev, Data Science, Machine Learning, Computer Vision

AWARDS

MIT Harvard Poker Tournament Winner

Mar 2026

Won as the **only high schooler** (I snuck in) | Beat out **50 MIT/Harvard** Undergraduates & 10+ Quants

1/50 UPenn M&T Admits (0.3%)

Mar 2026

Chess: Earned **>\$5,000** | **Top 30** on Lichess UltraBullet | **4th @ World Open**

2018 - Present

1st Place (\$5,000) - Innovation League **Pitch Competition**

October 2024

2nd Place (\$2,500) - Ctrl+Shift **Hackathon**

May 2024

1st Place - AMC 12B 2024 & 2025 | **Certificate of Distinction** and **AIME Qualifier**

Nov 2024

3rd Place - UPenn Mathematics Contest

Apr 2025
